The Premise

In a fractured future governed by military power and biomechanical innovation, Roger, an elite augmented soldier, is engineered for obedience—but haunted by the remnants of who he used to be. When a covert mission goes sideways, he crosses paths with Sianna Armor, a radical independent fighter whose only allegiance is to freeing her imprisoned family. Betrayed by the Resistance and hunted by the Republic, Sianna becomes both a reluctant ally and a disruptive force in Roger's tightly controlled world.

As their paths intertwine, the two must navigate treacherous political agendas, buried traumas, and the blurred lines between autonomy and design. Together, they uncover a conspiracy that threatens not only their lives but the fragile balance of human evolution itself.

About the Author

TM Kaiser writes speculative fiction that exposes the edges of technological influence and psychological complexity. She is an interdisciplinary artist with an MFA and a background in cultural critique, world-building, and narrative design.
